REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claim 21 includes the limitation of a tubular member having relative rotation with the wringing member wherein the wringing member has a second obstructing means on the interior wall surface.

Specht (USPN 6427280), Yates (USPN 5060338) and Morad (USPN 6125494) all teach a mop having a elongated handle, a mop element and a wringing member having a hollow body comprising a first obstructing means for engaging and confining the mop strands at terminal ends. The references fails to teach a second obstructing means mounted on the interior wall of the tubular member, nor would it have been obvious to combine references to achieve the claimed invention. For these reasons the applicant is free from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
